### **DETAILED ACTION**

The following is a first action on the merits of application serial no. 10/565,199 filed on January 20, 2006.

#### ***Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

#### ***Information Disclosure Statement***

The information disclosure statement filed on January 20, 2006 has been considered.

#### ***Election/Restrictions***

Claims 15, 16 and 19 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on April 22, 2008.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 18 is rejected under 35 U.S.C. 102(b) as being anticipated by Yamamoto et al 6,227,979. Yamamoto et al discloses a constant velocity joint (9) having an input shaft provided at a side closer to a ring gear of a differential (4) (shaft 8 extending from joint 7 which is connected to the differential 4 which means that 8 is closer to a ring gear

which are well known in the art to be used in differentials), a first power transmission member (15) provided at a side farther from the ring gear and connected to the input shaft via the velocity joint (9), an end of the transmission member has an inner surface (via 17) defining an internal cavity (see Figure 2) that opens towards the input shaft, an outer race (11) of the joint formed at the inner surface and an inner race (10) of the joint formed at a surface of the input shaft.

***Allowable Subject Matter***

Claims 11-14 and 17 are allowed.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
